ABOUT US

Since 1992 Weizur offers comprehensive solutions to dairy farmer's needs. Our mission is to be an effective, honest and reliable option to our customers.

We provide a complete line of products tailored to our customer's necessities:

- 🔥 **Hygiene and disinfection**
- 🐾 **Veterinary products**
- ⚙️ **Equipment.**

Our company has a long experience of in-house manufacturing of most of our products that attend mainly a dairy farms.

Quality is always present at each step of the processes that take part when conceiving our products granting reliability and excellent results.

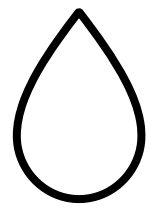

We focus our efforts in order to strengthen our position as a leading company not only in Latin America but in the rest of the world.

Our clients value and recognize our corporate history and continue to choose our products.

This is largely a result of constant training, collaboration and service attitude of our human resources.

THE MOST EFFICIENT IODINE PRODUCTS OF THE MARKET

IODINE TEAT DIP

U20

Teat dip with
povidine iodine
5.000 ppm

U20 contains PVP- iodine, an iodinated polymer that allows sustained progressive release of iodine, which exerts bactericidal activity during post-milking closing of the teat canal.

U20 also has moisturizing and **healing properties for teat skin.**

CLEANERS / DETERGENTS SANITIZERS

S100

**Alkaline chlorinated
liquid detergent.**

Liquid cleaner specifically formulated for use in closed circuits of the food industry, as well as cleaning of utensils and equipment used in the milking parlor. Thoroughly removes organic residues resulting from the milking routine.

Suitable for use with hard water, preventing mineral deposit buildup.

S-100 is a double purpose detergent, both cleaning and disinfecting in one step. Cleaning effects are due to phosphonates and other inorganic compounds, and bactericidal activity is achieved by chlorine. Suitable for use on stainless steel, iron, glass and aluminum surfaces at the recommended dose.

A500

Acid descaling
detergent

A-500 is an acid detergent specifically formulated for use in closed circuits of the food industry, preventing and eliminating mineral and organic deposits caused by milk and water.

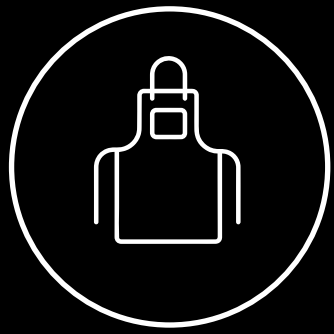

Celocheck

Cattle paint

Visual aid for quick identification
of animals on heat.

- More cost-effective and reliable than other heat detection aids
- Long-lasting duration after application, unlike crayon or chalk products, but blurs or fades as needed, unlike other synthetic paints.
- Unique product formulation, specifically designed for this purpose
- Easy to use and store
- Non irritant, water resistant.

APRON

WATERPROOF

Waterproof, lightweight, resistant apron, ideal for milking, equipment and milking parlor hygiene, calf feeding and other dairy farm activities.

Adjustable straps and plastic snap allow easy and comfortable fit

Polyvinyl chloride (PVC) material keeps clothing dry and protected from dirt and liquids.

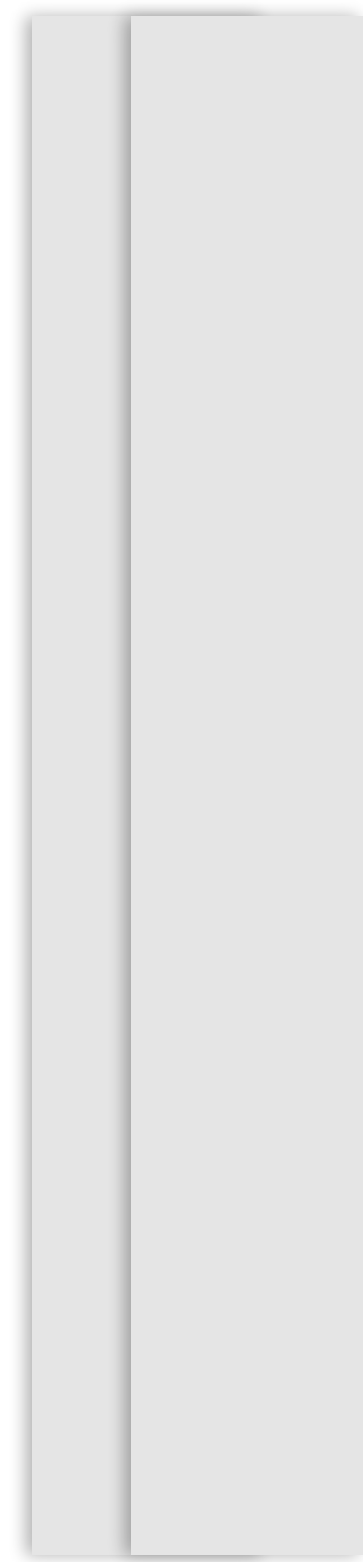

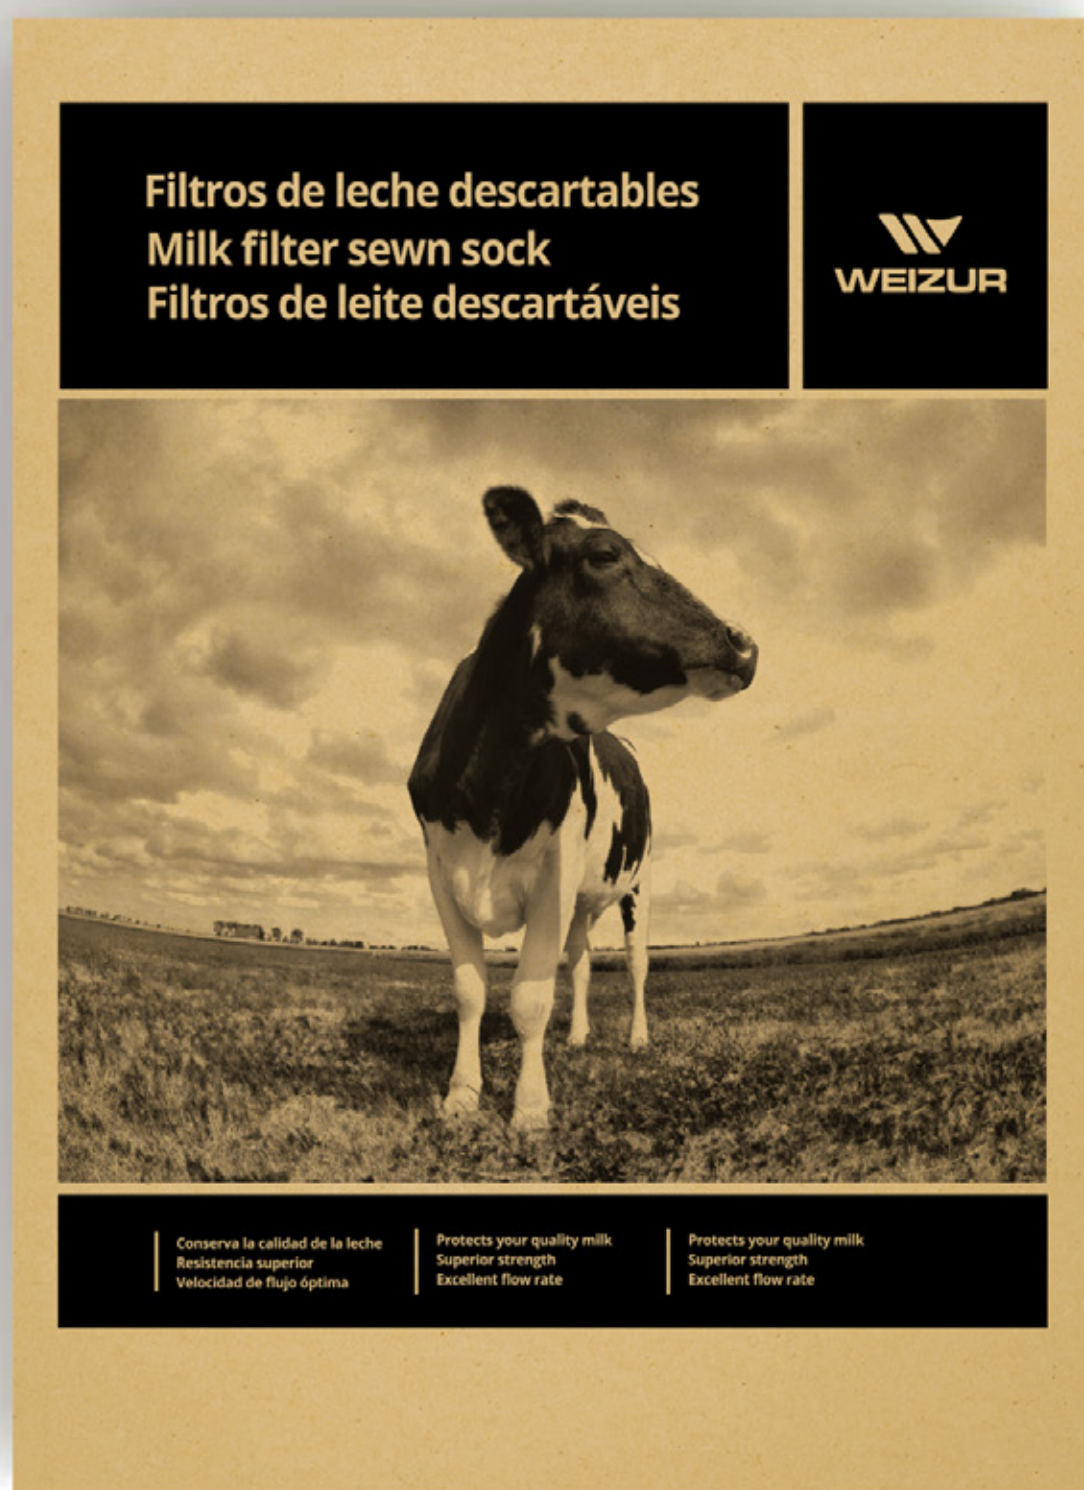

Easy to clean and disinfect, preventing microbial adherence to clothing.

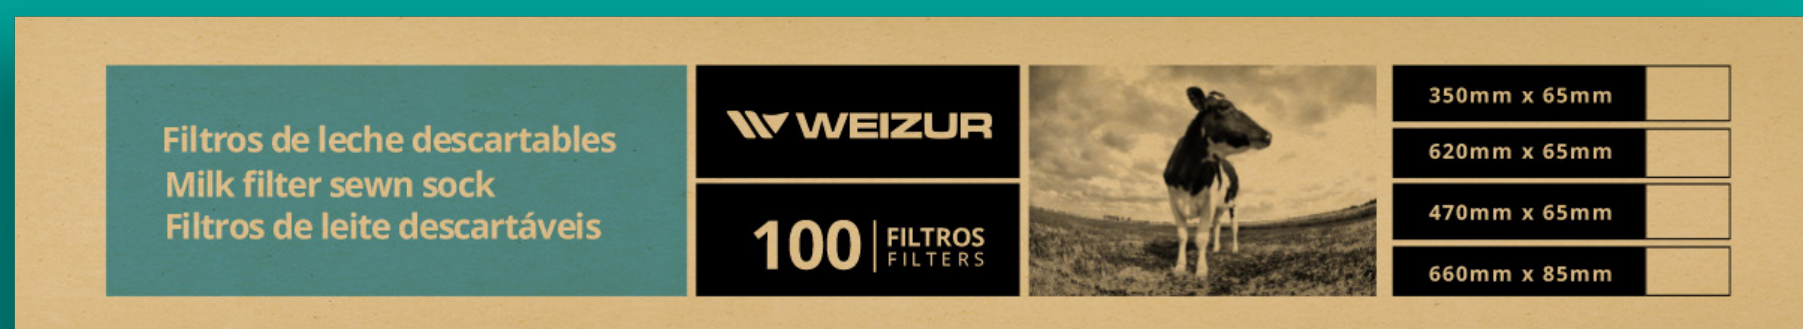

MILK FILTERS

DISPOSABLE

Non-woven material
provides highly effective filtration.
Resistant seams.
Exceptional strength, even with high milk flow.

Profer Filter

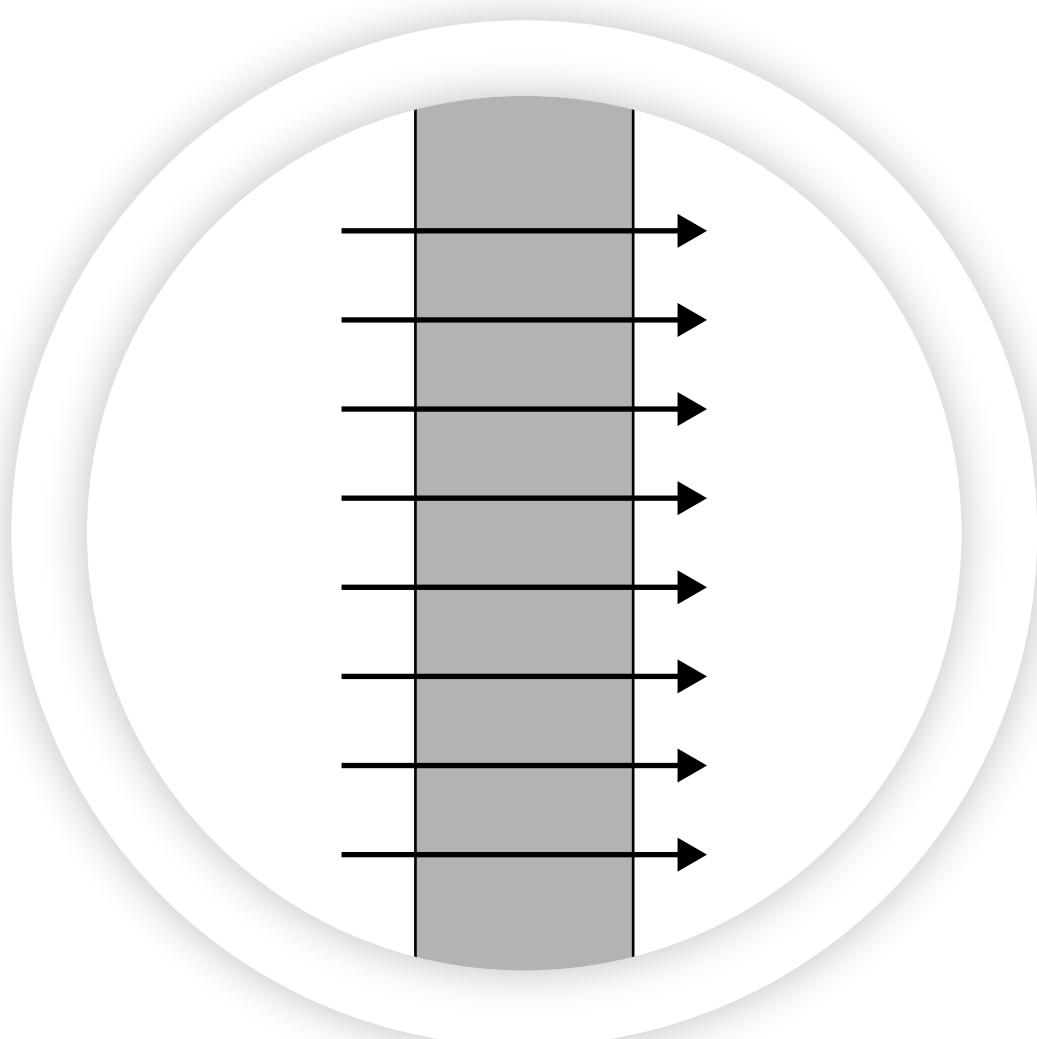

Weight: 60g

Permeability: 3500 L/M2/S

Certification: FDA

Weight

Weight: 60g

Permeability

Permeability: 3500 L/M2/S

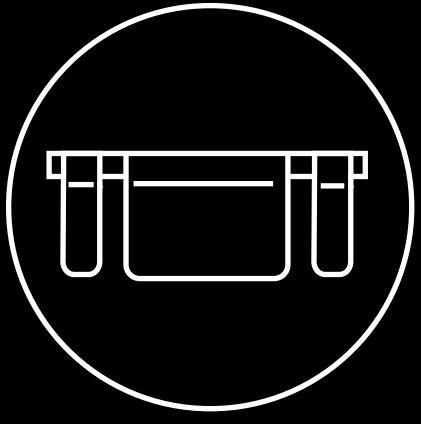

MILKING SLEEVES

WATERPROOF

Easy to clean and wash
Keeps arms clean and dry
Adjustable for a customized fit

Made with exterior water-resistant material, interior non-woven material, elastic cuff and Velcro at the upper end for a snug fit

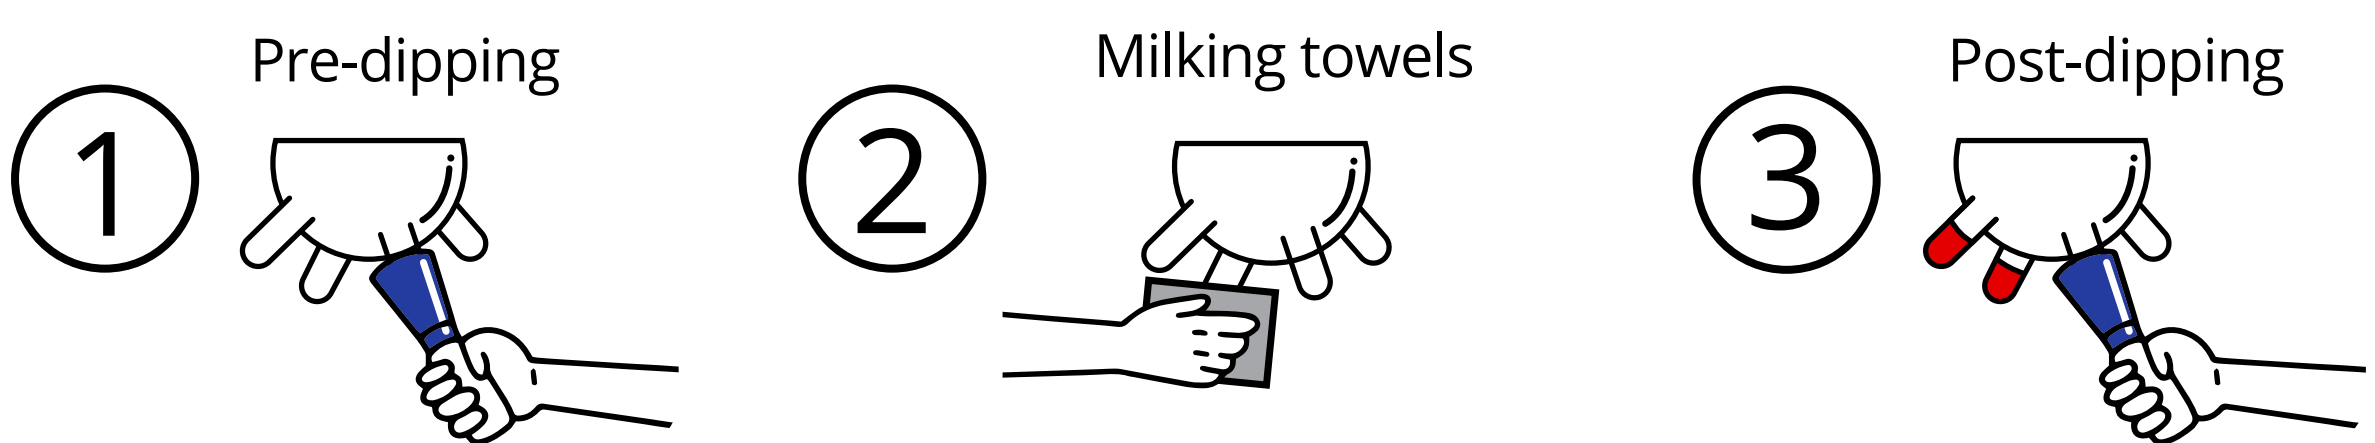

MILKING BELT

MILKING ROUTINE

Water-resistant belt for milking routine accessories. Allows quick and easy access to pre- and post-milking teat dips, milking towels and other supplies.

Belt with three pouches that slide freely, allowing a comfortable and customized fit. Central pouch for milking towels, and side pouches for pre and post-milking teat dips. Allows quick and easy access to hygiene products that are critical for mastitis control. Speeds up milking time by reducing the distance and time spent walking to find the required product.

SENSYFLEX

INSEMINATION GLOVES

Disposable gloves

100units -90cm

Applications:

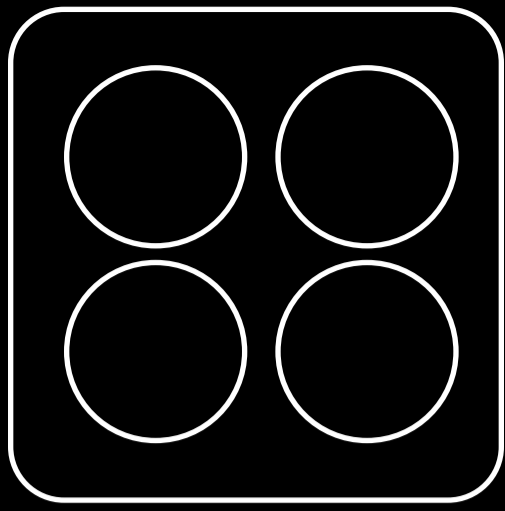

For artificial insemination, rectal palpation, obstetrics, necropsy.

- Excellent feel
- 100%SAFE
- 100 units
- Veterinary Use

Nitrile

Gloves

CALIFORNIA MASTITIS TEST

WEIZUR TEST

A rapid cow-side test for early detection of bovine mastitis by estimation of somatic cell count in milk.

Indications

Presentation: 1L

Collect approximately 2 ml milk from individual quarters into a CMT testing paddle. Add equal amount of Weizur test to each cup. Gently rotate mixture in a horizontal position. Reaction can be observed almost immediately. Thickening or gel formation indicates high somatic cell counts and likelihood of mastitis. Follow indications from your veterinarian for appropriate treatment.

GLYCERIN

Glycerin is a dehydrating agent, with hygroscopic and lubricating properties. Serves as a humectant and emollient, preventing irritation and improving skin conditioning. Glycerin has some germicidal activity.

When administered orally, glycerin has mild sweetening, demulcent, and weak laxative effects. It is a good solvent for organic and mineral substances.

Specifically, glycerin has the following uses:

- In topical medications, improves dry skin, itching, eczema and irritation
- In suppositories, relieves constipation and helps pass hard stools
